- Major: Arts - Math

**Bangkok, Thailand**  
**Jul 2020 – Mar 2023**

## EXTRA-CURRICULAR ACTIVITIES

### Chula LegalTech Hackathon (12 Finalists) | Participant (Ongoing)

- Collaborating with a multidisciplinary team to develop “Roem Mai”, an AI-driven platform that connects ex-offenders with employment opportunities while mitigating hiring risks for employers.
- Recognized the importance of IT GRC in ensuring PDPA compliance and advocated for risk management strategies to protect sensitive user data.
- Conducted business feasibility analysis, evaluating the social, legal, and financial impact while aligning platform governance with risk management and compliance frameworks.

**Bangkok, Thailand | Dec 2024 – Present**

### InsurTech Case Competition (Winner) | Mandatory Case Competitor

- Developed an innovative solution to improve accessibility to insurance systems by integrating statistics, IT, and insurance principles.
- Collaborated with a cross-functional team to analyze industry challenges and design a data-driven platform for inclusive insurance access.
- Presented a comprehensive business proposal and prototype to a panel of academic judges, emphasizing technological innovation and feasibility.

**Bangkok, Thailand | Nov 2023 – Dec 2023**

## PROJECTS

### IT GRC Frameworks Website

- Designed and developed a React-based platform to provide insights into IT Governance, Risk, and Compliance frameworks (NIST, ISO 27001, COBIT, PCI DSS).
- Researched and structured compliance frameworks into an accessible educational platform, reinforcing risk management and governance principles.

### Mobile Concept – Car Audio Service Website

- Designed and developed a React-based website for Mobile Concept, enhancing the online presence of a car audio installation service.
- Launched and deployed the website at [mobileconcept.co.th](https://mobileconcept.co.th), ensuring full functionality while identifying opportunities for further UX/UI enhancements.
